

33RD ANNUAL
FORAGE TESTED
BULL SALE

SATURDAY, FEBRUARY 6, 2021 1:00 PM
AT THE RANCH, NORTH OF LAWRENCE, KS

SWEARNGIN RANCHES, LLC

WELCOME!

Time is our greatest teacher. This is our 33rd Bull and select female offering, and our 41st year raising cattle. As self-made cattlemen we have realized many things over the years, but the one most important lesson has been to balance the cattle in your environment. Never has this been so apparent than living through a year like 2020. As self-made 100% ranchers, it has always been about the efficiencies of production, not about how big calves are at weaning as much as what we spend to get to the end of the year.

We have always looked for the best way to manage our resources of land, forage, time, and genetics. All must work together efficiently, or you lose too much money and as Tom always says, "At What Cost?" Everything has a cost! Over the years as we pushed performance too far, we lost too many females to fertility and longevity. One of the costliest segments of ranching is losing too many females to low fertility (not breeding back). It matters not what your weaning weights are if you lose too many cows not breeding back. We have spent 40 years culling females that didn't breed back. Today we find that when we push performance too hard too many cows fall out and we must pull back.

Balancing forage, time and genetics in your environment is the key to consistent profitability we have found. We have no control of cattle prices, markets and politics. All we can control is what we must work with. Our cows graze all year. They never come off grass, we haven't fertilized our pastures in over 30 years, and we have more grass and run more cows than ever before reducing our annual cow costs to below \$500/ cow unit, while the national average annual cow cost is approaching \$1000/cow unit. If calves are \$800... you see where you are. Efficiency is at every angle and every step we take. People wonder why our bulls do what they do? It's because it's a complete system approach. We don't use industry propaganda, EPDs or extremes. All these things led us to financial losses that were not sustaining.

You will see again in this catalog that we have moved forward past industry systems, EPDs that simply were ineffective in measuring true production of cattle. They have become nothing more than marketing chasers that change weekly. As full-time cattlemen we had no option but to find a system that truly evaluated the cattle, so we went to AG Boost, three years ago. We couldn't be happier, and it shows what our cattle are in the most important 15 traits for all cattlemen. DNA based, so they aren't changing. This system genuinely indicates what each animal is, like lifting the hood and seeing the engine. AG Boost, measures our cattle against ALL Breeds! Not a subset of hand-picked Angus cattle. We now have customers that are using this system on their females, which allows them to match our bulls to their females so they can get what they desire in their program, no more guessing.

We will also be offering this year a select group of Pairs and a nice group of fall bred heifers, for those looking for females. We look forward to seeing you on February 6th, 2021, or any time between now and then that you want to come look through the offering. If you can't, make it to the sale please feel free to contact us and we will help you in any way we can.

Tom, Kim and Grant Swearngin
Gavin, Sierra and Brynlee Swearngin
Craig Guffey

MARCIA SWEARNGIN-MCGHEE

Swearngin Ranches is and has always been about family. This year we lost a member of our family, Tom's sister, Marcia. For many years Marcia clerked our sale and always helped where we needed someone to pitch in. Marcia's husband Lynn, and her sons are also a huge help sale day with cattle penning, and fixing anything that breaks last minute, like the electrical system. Marcia will be dearly missed. We wish them all the best in the coming year.

33RD ANNUAL BULL SALE

SALE DAY PHONES

SCHEDULE

FRIDAY, FEBRUARY 5, 2021

Bulls on Display

SATURDAY, FEBRUARY 6, 2021

9 a.m. Coffee and Pastries

12 p.m. Lunch Served

1 p.m. Sale Starts

SALE SITE

Swearngin Angus Ranch

18425 21st Street

Lawrence, Kansas 66044

DNA

Individual DNA Information is provided for every bull in the sale from AG Boost. Traits each bull excel in are listed with the lot. Additional information on AG Boost and the Swearngin Angus genetic profile is on page 23.

SUPPLEMENTAL INFORMATION

A supplement sheet will be available sale day with complete and up-to-date information. Announcements from the auction block take precedence over sale book information.

HERD HEALTH

Proper health certificates for immediate shipment will accompany all cattle.

LIVESTOCK MORTALITY INSURANCE

Will be available for your purchases sale day if you choose, ask at time of settlement. Lot numbers are the animal's ID number, tag and or freeze brand. Swearngin Angus is retaining a semen interest in all of the bulls in the sale. This means you own the bull and salvage value. This just allows us the opportunity to collect your bull, at your convenience, if we so choose.

TERMS AND CONDITIONS

All purchases are to be settled on sale day unless prior arrangements have been made. Terms of the sale are cash or check on sale day or payment wired on the next business day. Cattle will sell under the suggested terms and conditions of the American Angus Association (www.angus.org/pub/suggested_sale_terms.pdf)

- Bulls are semen-tested with a first breeding season guarantee.
- Any bull not picked up within 10 days of purchase will be subject to feed, yardage, and will be charged an insurance premium to protect both the buyer and seller of the bull's value.
- Registration papers on bulls will be supplied at the request of the purchaser.

If a buyer is unable to attend the day of the sale, please contact us by phone, and we will be glad to assist you.

VIDEOS

Videos for each lot are available at

AGBOOST SCORE

Proving to be one of the leading Charlo sons in existence. He spent 3 years in Tennessee and Alabama at McCormick Angus before coming home. His oldest daughters are now coming 4 and are quickly moving to the top of their age group. Udder quality and disposition is outstanding. You will see extra base width and efficiency in these cattle. For those looking for grass-based value, look closely at these.

AGBOOST SCORE

Moderate bull that again would be a great selection for the grass-based operation that needs balance and consistency. His maternal granddam is still here in production at 13. Great longevity!

AGE ADVANTAGED BULLS

This is one of our purchased herd sires that offers what we were looking for in a complete package. He brings in a different line of Rito and combines one of the most proven cows to leave the Sinclair program – she produced into her late teens. She offers a great proven old Montana pedigree that is hard to find today. We believe in isolating the most consistent, proven cows and bulls in our program that we can find. We compound those lines in our cattle then test them in a true grass, environment. The ones that succeed we move forward, the ones that fail are culled. Revolver adds muscle and completeness of structure and phenotype with tremendous efficiency. This makes us money.

Customer's Calves

FEMALES

COW-CALF PAIRS

A uniquely linebred young female. The 478 cows weaned some of the largest calves in our spring herd. She has a heifer calf at side by 762, making this heifer calf the product of a half brother-sister mating for consistency.

</

A moderate easy fleshing daughter of 3XX7/974 combo for forage efficiency. She produces cattle that are moderate and efficient like she is. Sells with a bull calf by Swearngin Charlo 479.

</

A young cow that combines many of our great baseline sires, 974, 9167 and Nemo. She is from our Forever Lady cow line that originated from the famed SVF Forever Lady 57D, the dam of Boyd New Day. She sells with a Heifer calf by Swearngin Rito 552, very nice cow prospect.

A full sister to our long-time performance son of 974, 219. She is a nice easy fleshing female with a yearling production ratio of 103. Her dam 812, is a flush sister to 6177, the dam of our Bushwacker 8132 bull also. She sells with a heifer calf at side by Swearngin Rito 552. Crossing the Miss Wix and Bridget cows and doubling up 974.

A uniquely bred Right Time/Ideal 692 bred cow. Tremendous efficiency built into this pedigree with added production from Cedar Ridge. Weaning and yearling ratios of 102/107. She sells with a Swearngin Rito 552 bull calf.

FEMALES

BRED HEIFERS

We are offering this group of fall bred heifers this year. These were all home raised heifers. After growing for the past 10 years we have finally reached maximum carrying capacity, so we will be offering females annually. We will offer both registered and commercial females. All Bred heifers have been exposed to **Swearngin XTRA 8118**. All heifers were raised on grass and after weaning grown on 5lbs of feed and free choice hay to keep them growing. We are also offering a group of Red Angus heifers this year. They are nice stout heifers bred to 8118. Heifers must bring \$2,000 a piece on registered heifers to get registration papers.

10 COMMERCIAL OPEN HEIFERS

This year we are also including 10 F1 Optimizer Heifers ready to breed in the spring for our commercial customers looking for some outstanding replacements. Heifers will be sold in two groups of 5, gate cut. Like all our cattle they have been vaccinated with Pyramid 5, Blackleg/Somnus and poured on wormer.

Calving Ease Key:				1-2 * = Cows 3-5 * Heifers										
Ag Boost Traits				1-5 equals the breakout of the top 5 bulls for each trait										
Example				is that is the top bull for ADG...										
Example				he is the 5th highest bull for ADG.										

GENETIC EVALUATION THROUGH AG BOOST

WHO AND WHAT IS AG BOOST:

AG Boost is an independent genetic data company, that process your DNA through Igenity, which is a non-breed specific third-party DNA lab. The data comes back to AG Boost in a 16 trait genetic profile. These 16 traits are the core of what most cattlemen need to help make a more targeted selection for their sire needs. From these 16 traits, there are four target areas that you can see more specifically how the individual performed compared to others. Those areas are Production, Maternal, Performance, and Carcass Traits.

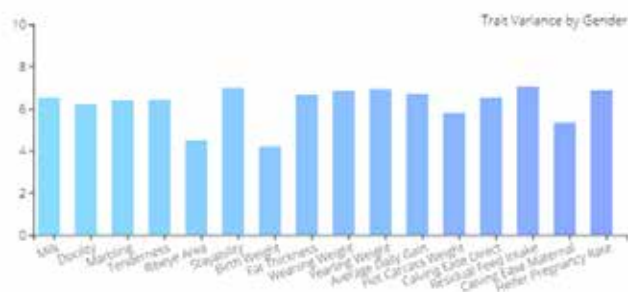

CHOICE:

As the industry leans more toward being data-driven, we were looking for a company that would give us a non-biased DNA evaluation. While attending a cattle conference I walked up to the AG Boost booth and started talking with them to see what they had to offer, three hours later I was encouraged by what they had to say. Tom, Gavin and I discussed it and decided to give it a try. Why did we choose AG Boost over Angus Genomics? Quite simply we were looking for a non-biased 3rd party evaluation of what our cattle are. Another feature is the simplicity at which data is presented. It is easy for anyone to understand and use for their selection needs.

BULL SALE INFO:

While you will see the base EPD's for each bull listed as usual from the association, you will also see the top 3 traits according to their DNA. Because the data format is new this year, it was challenging to figure out how to present it in the catalog. We opted to list the top 3 DNA traits for each bull in the comment section under their pedigree. The first trait is their number one trait, second is two, and so on. On sale day we will have every bulls' data available for anyone to see. If you have any questions, feel free to contact any of us at Swearngin Angus and we will be happy to visit with you further about it. Let me say in no way does this change our bulls; it simply provides additional information on each bull that isn't visually seen.
